

CEN/TC 217 «Sport surfaces»

Situation : work program

WORKING GROUPS

WG	Title	Convenor	
WG 11	TEST METHODS	A. COX	
WG 2	INDOOR SURFACES	A. RIVAT	
WG 6	SYNTHETIC SURFACES	A. COX	
WG 10	ENVIRONMENTAL ASPECTS	DIN	

■ STANDARDS UNDER REVISION :

- EN 14836 : Exposure to artificial weathering
- EN 12228 : Determination of joint strength of synthetic surfaces
- EN 12234 : Determination of ball roll behaviour
- EN 15306 : Exposure of synthetic turf to simulated wear
- EN 12229 : Procedure for the preparation of synthetic turf
- EN 12235 : Determination of vertical ball rebound
- EN 12616 : Determination of water infiltration
- EN 14903 : Determination of friction : rotational and linear (2 parts)

■ NEW WORK ITEM :

- Determination of shock absorption and deformation : Triple A method
-

■ REVISION of EN 14904 :

- Discussion on the improvements proposed by each country
- Two parts : laboratory control and site control
- Discussion on the definition of the 4 classes
- Discussion on the table which gives an exemple of the 4 classes : normative and not informative
- Discussion on the introduction of triple A
- Discussion on the toxicological aspects : New mandate M 119 to take into consideration
- Discussion on flamability and fire resistance

■ REVISION of EN 14877 and EN 15330-1 and -2 :

- ➔ Discussion on the improvements proposed by each country
- ➔ Two parts : laboratory control and site control
- ➔ Discussion on the introduction of triple A

■ NEW WORK ITEMS :

- ➔ LEACHING TEST FOR ARTIFICIAL TURF
- ➔ DETERMINATION OF DUST
- ➔ DETERMINATION OF VOLATIL ORGANIC COMPOUNDS

- ➔ Discussion on mineral oil and skin contact.
